2.3. What are the key risks that are specific to the Issuer?

Financial risks

- (i) **Construction costs and Project's success risk.** The Issuer's and the Management Company's employees invoked all available information and analytic resources when planning the Project, however, there is no guarantee, that all information on which the investments in the Project planned were based was true and exhaustive. Furthermore, the outbreak of coronavirus (the **COVID-19**) together with increased geopolitical tension because of the war between Russia and Ukraine which started in February 2022 caused high pressure on the global building materials supply chain and rise of materials and local labor costs. The Project's construction costs were planned considering various scenarios, including negative ones and many materials necessary for the constructions were bought in advance. However, as the situation in global markets and building materials supply chain is changing frequently, by the time of completion of the Project the key variables regarding which investments assumptions have been made, could significantly change and adjustments to the initial calculations might be required in the later stages of the Project due to reasons indicated above. An unexpected increase in construction costs or inability to secure construction material required to complete the Project may reduce the overall profitability of the Project, delay the completion of the Project and as a result adversely affect the Issuer's activities, financial situation, and ability to redeem the Bonds. Even if the economic and geopolitical situation would stabilize until completion of the Project, there is no guarantee the investments made will generate anticipated or planned return on the Project. Moreover, the Company cannot provide any assurance that there will not be any disputes with its suppliers or that it will be able to maintain business relationships with its existing suppliers. Any disruption to the Company's supply chain as a result of an issue with a supplier, or any damage to such supplier's integrity could cause the Company significant time and expense in remediation of any deficiencies and could impact its reputation, which could adversely affect its reputation and profitability.
- (ii) **Economic environment (both domestic and international) and insolvency risk.** The Issuer's activities and results depend on the economic processes in Lithuania and internationally. Since the beginning of the COVID-19 pandemic the businesses across the globe are facing economic disruptions, supply-demand imbalances, and high uncertainty about the prospects of the business development. The war between Russia and Ukraine is also contributing to already existing economic tension, however currently it is hard to estimate what impact the war will have on Lithuanian economy. Even if currently, there is no material economic downturn both domestically and internationally, in the event of its occurrence, the demand for the Issuer's services may decrease, the risk of insolvency of the Company's tenants and/or other contractors may increase, which may have a negative impact on the implementation and results of the Issuer's business strategy and the Project may not generate expected positive returns. These factors individually, or in combination might cause the insolvency

NOTE: this consolidated Prospectus containing amendments made under the first-fifth supplements to the Prospectus all published on the Issuer's website at https://lordslb.lt/orkela_bonds/ has not been approved by the Bank of Lithuania and is provided only for informational purpose.

of the Issuer. The Issuer is subject to the Law on Insolvency on Legal Entities of the Republic of Lithuania and Issuer's insolvency may affect the Investors' ability to recover their anticipated earnings and/or investments.

- (iii) **Negative equity risk.** According to the BAS Financial Statements for the year ended 31 December 2021, the Issuer had a negative equity amounting to -EUR 6,761,260 during the financial year 2021, i.e. the Issuer's liabilities exceeded the amount of the Issuer's equity. The negative equity situation has been rectified partially on 24 February 2022 by issuing and subscribing by the Fund 20 new Shares of the Issuer with EUR 25 par value each. The subscription price of new Shares was EUR 7,000,000, which has been paid by the Fund by setting of the obligations for partial redemption of bonds issued under the Bond subscription agreement of 15 November 2018 and payment of subscription price for new Shares. On 2 May 2022 the shareholder (i.e. the Fund) decided to cover the negative equity by additional shareholder's injection of EUR 203,727. As of 2 May 2022, the Issuer's equity is positive and reaches EUR 100,000. Since the Issuer had no income from the Project until approval of this Prospectus, the shareholder's investments into the Project caused the fact of Issuer's equity being negative. Although solved, such change is not reflected in the available financial statements of the Issuer and has not been audited yet. Moreover, there is a risk that negative equity situation may repeat or emerge again until the day the Projects starts generating income. The described situation may negatively impact the Issuer's ability to get financing/refinancing for the Project's development and/or to redeem the Bonds in a timely manner.

Business activities and industry risks

- (i) **Hospitality market risk.** A large part of the Project is dedicated to the development of the hotel complex. The Lithuanian and global hotel sector has been highly affected by the COVID-19 pandemic, which has led to a sharp drop in occupancy rates and room prices. If the negative impact of COVID-19 persists until the opening of the planned hotel as a part of the Project, it may lead to worse-than-expected financial results of the hotel assets, which in turn may adversely affect the Issuer's ability to redeem the Bonds. In addition to that Russia's war in Ukraine, still ongoing on the date of this Prospectus, could have a negative effect on the Lithuania's attractiveness as a destination for foreign tourists. A resulting drop in demand could have a negative effect on the financial results of the hotel assets of the Project. As the value of the hotel part of the Project is determined mainly by the profitability of hotel operations, such decrease in demand would adversely affect Issuer's ability to redeem the Bonds.
- (ii) **Real estate market risk.** Potential negative development of Lithuanian real estate market could have a negative impact on both real estate market prices and market transaction volume. At the date of this Prospectus increase in geopolitical risks caused by the Russia's war in Ukraine is considered as a one factor which could have a negative effect on the Lithuanian real estate market. Decreases in prices and volumes could have an adverse effect on the Company's financial position and could degrade the value and liquidity of real estate mortgaged in favour of the Bondholders as a Collateral (please see Section 3.1.3 of the Summary) which in turn could have adverse effect on the Bondholders' ability to fully satisfy their claims against the Issuer under the Bonds.

Legal risks

- (i) **Risk of legal disputes.** The Issuer may be involved in legal disputes due to its activities (as plaintiff or defendant), the outcome of which cannot be predicted in advance. If a dispute is resolved in the manner unfavourable to the Issuer, this could adversely affect its operations, financial condition, and reputation as the Issuer may be required to pay damages awarded, including the legal costs of the opponent (the Issuer itself would also incur legal costs). All of this can have an impact on the Issuer's ability to properly perform its obligations to the Bondholders, and on the attractiveness and liquidity of the Bonds.

Governance and internal control risks

- (i) **Ownership risk.** The Issuer is a company 100% owned by the Fund that is controlled by the Management Company, having prominent expertise, management team, professional staff and resources to outsource professional advisers. The Fund shall be closed after 5 years from its establishment in 2016, with the possibility to prolong its term for additional 2 years. Change in ownership of the Issuer (in case of the closure of the Fund at its maturity or sale of the Issuer's Shares before Fund's maturity) could result in reduction of attractiveness and liquidity of the Bonds, as well as early redemption of Bonds.

The Bonds are freely transferable, subject to certain transfer restrictions under the relevant laws in certain jurisdictions, as may be applicable to the transferor or the transferee.

3.2. Where will the securities be traded?

The Issuer will seek Admission of the Bonds to trading on the Bond List of Nasdaq Vilnius AB (the **Bond List of Nasdaq or Nasdaq**). The Bonds will be publicly offered in the Republic of Lithuania, the Republic of Estonia and the Republic of Latvia.

3.3. What are the key risks that are specific to the securities?

General Bonds' risks

- (i) **Interest rate risk.** The Bonds bear interest on their outstanding Nominal Value at a fixed interest rate. Investors are exposed to the risk that the value of the Bonds decreases as the results of changes in the market interest rates. While nominal interest rate of the Bond is fixed until its redemption, the prevailing capital market rates change on a daily basis. If the market interest rate increases, the market value of the Bond may fall.
- (ii) **Inflation risk.** Inflation reduces the purchasing power of a Bond's future coupons and principal. Inflation may lead to higher interest rates which could negatively affect the Bond price in the secondary market. In addition to that, at the time of this Prospectus high inflation is viewed globally as one of the main macroeconomic factors posing significant risk to global economic growth and consequentially to the value of both equity and debt securities.
- (iii) **Refinancing risk.** The Issuer plans to use bank loan as the main source for the redemption of the Bonds. The Issuer's ability to successfully refinance its debt is dependent on the conditions of the debt capital markets and its financial condition at such time. Even if the debt capital markets improve, the Issuer's access to financing sources at a particular time may not be available on favourable terms, or at all. The Issuer's inability to refinance its debt obligations on favourable terms, or at all, could have a negative impact on the Issuer's operations, financial condition, earnings and on the Bondholders' recovery under the Bonds. The Issuer's preventative actions and/or anticipated plans on refinancing of the Bonds described above does not guarantee that the Issuer will be able to redeem the Bonds as anticipated on the day of the Prospectus and that Bondholders will recover their planned investments.

Offering and Admission to trading on the Bond List of Nasdaq related risks

- (i) **Project Rating and the Platform Operator.** Considering that the Bonds of certain Tranches may be offered by the Issuer by way of the Crowdfunding carried out through the Platform(s) operated by the Platform Operator(s) in accordance with applicable laws, the Investors shall acknowledge that in case the Bonds of certain Tranches are offered by way of the Crowdfunding, the Project Rating assigned to the Issuer (Project holder)/Project by the Platform Operator (if any) is not an official rating of a credit rating agency, also it is not approved by any competent authority and is determined independently by the Platform Operator following its own assessment methodology. Therefore, each potential Investor into the Bonds should assess the Project Rating with caution before making any investment decision. Moreover, the Issuer cannot guarantee due performance of the Tripartite Agreement, if any, by the Platform Operator and/or that the Platform through which the Crowdfunding would be carried out will work without interruptions and/or free of errors. Each potential Investor into the Bonds should assess the reliability of the Platform Operator and the Platform, if any, disclosed by the Issuer in the conditions of the respective Tranche published on the Issuer's website.
- (ii) **Liquidity risk.** The Bonds constitute a new issue of securities by the Issuer. Prior to Admission to trading on the Bond List of Nasdaq, there is no public market for the Bonds and other securities of the Issuer. The liquidity of the Bonds cannot be guaranteed. Bondholders might bear a loss due to not being able to sell the Bond or having to sell them at an unfavourable price.
- (iii) **Continuous Offering.** Offering under this Prospectus is a second part of total EUR 40,000,000 Issue. Although the Issuer plans to proceed with the public Issue up to total EUR 40,000,000 amount, it may happen, that the Issuer will not issue anticipated units of Bonds under this Prospectus and will not raise estimated proceeds

NOTE: this consolidated Prospectus containing amendments made under the first-fifth supplements to the Prospectus all published on the Issuer's website at https://lordslb.lt/orkela_bonds/ has not been approved by the Bank of Lithuania and is provided only for informational purpose.

required for successful development of the Project. Notwithstanding previous concern regarding success of the Offering under this Prospectus, there is a risk that the third part of the Issue in the amount of up to EUR 17,000,000 (or increased amount due to unsuccessful Offering under this Prospectus) to be offered under new prospectus won't be approved by the Bank of Lithuania (or won't be approved under the same rules) and therefore new prospectus won't be published (or will be published with material changes). Both situations would have significant influence on the amount of total proceeds from the Bonds, development of the Project, financial stability of the Issuer and the amount of Bonds available in the market.

- (iv) **Not suitability of the Bonds to some Investors.** The Bonds may be not suitable investment to some Investors. Each potential Investor into the Bonds should assess suitability of the investment taking into account all relevant personal circumstances. The potential Investor shall be aware, that the Issuer itself is not obliged and will not carry out the assessment, whether the Bonds are a suitable financial product for him/her (although such assessments will be performed by the Lead Manager/Managers and Platform(s), in any case such assessment(s) may have a different scope and produce a different result). Prospective Investor should not invest into the Bonds unless he/she has sufficient personal experience himself/herself or with the advice of professional financial advisors, can evaluate the impact on the value of the Bonds upon changes in market and economic conditions, the resulting effects on the value of such Bonds and the impact this investment will have on the potential Investor's overall investment portfolio.

Collateral related risks

- (i) **Risk of insufficient value of the Collateral.** The Issue is secured by a first ranking mortgage over the Collateral under the Collateral Agreement. Apart from the Collateral, there are no other securities of third parties securing the Issue under this Prospectus. Collateral consists of real estate property currently developed and constructed by the Issuer as a part of the Project. As a result, the value of the Collateral directly depends on the construction progress and successful completion of the Project and in case of Issuer's default before the end of construction stage the value of the Collateral could be not high enough to cover Issuer's obligations to the Bondholders. In addition to that, in case of negative development of Lithuanian real estate market and resulting significant drop in the value of the Collateral even after completion of the Project, the value of Collateral could be not high enough that all claims of the Bondholders could be satisfied.

IV. RISK FACTORS

The following is a disclosure of certain risk factors that may affect the Issuer's ability to fulfil its obligations under the Bonds. All of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring. In addition, factors which are material for the purpose of assessing the risks associated with the Bonds are described below. The Issuer believes that the factors described below represent the principal risks inherent in investing in the Bonds, but the inability of the Issuer to pay interest, principal or other amounts on or in connection with the Bonds may occur for other reasons which may not be considered significant risks by the Issuer based on information currently available to the Issuer or which it may not currently be able to anticipate. Prospective Investors should also read the detailed information set out elsewhere in this Prospectus and reach their own views prior to making any investment decision.

Before deciding to purchase/subscribe the Bonds, Investors should carefully review and consider the following risk factors and other information contained in this Prospectus. Should one or more of the risks described below materialise, this may have a material adverse effect on the business, prospects, shareholders' equity, net assets, financial position and financial performance of the Issuer. Moreover, if any of these risks occur, the market value of the Bonds and the likelihood that the Issuer will be in a position to fulfil its payment obligations under the Bonds may decrease, in which case the Bondholders could lose all or part of their investments. Additional risks and uncertainties, which are not currently known to the Issuer or which the Issuer currently believes are immaterial, could likewise impair the business operations of the Issuer and have a material adverse effect on their cashflows, financial performance and financial condition. The order in which the risks are presented does not reflect the likelihood of their occurrence or the magnitude of their potential impact on the cash flows, financial performance and financial condition of the Issuer.

This part provides information on the risk factors related to the Issuer and the offered Bonds. This information should not be considered as comprehensive description covering all possible aspects of risk factors related with the Issuer and the Bonds. The following risks might have adverse effect on the Issuer and on extreme circumstances might cause insolvency of the Issuer and breach in performing obligations arising under the Bonds.

4.1. Risks related to the Issuer

4.1.1. Financial risks

Construction cost and Project's success risk

The Issuer's and the Management Company's employees invoked all available information and analytic resources when planning the Project, however, there is no guarantee, that all information on which the investments in the Project planned were based was true and exhaustive. Furthermore, the outbreak of COVID-19 together with increased geopolitical tension because of the war between Russia and Ukraine which started in February 2022 caused high pressure on the global building materials supply chain and rise of materials and local labor costs.

The Project's construction costs were planned considering various scenarios, including negative ones and many materials necessary for the constructions were bought in advance. However, as the situation in global markets and building materials supply chain is changing frequently, by the time of completion of the Project the key variables regarding which investments assumptions have been made, could significantly change and adjustments to the initial calculations might be required in the later stages of the Project due to reasons indicated above.

An unexpected increase in construction costs or inability to secure construction material required to complete the Project may reduce the overall profitability of the Project, delay the completion of the Project and as a result adversely affect the Issuer's activities, financial situation, and ability to redeem the Bonds. Even if the economic and geopolitical situation would stabilize until completion of the Project, there is no guarantee the investments made will generate anticipated or planned return on the Project.

Moreover, the Company cannot provide any assurance that there will not be any disputes with its suppliers or that it will be able to maintain business relationships with its existing suppliers. Any disruption to the Company's supply chain as a result of an issue with a supplier, or any damage to such supplier's integrity

NOTE: this consolidated Prospectus containing amendments made under the first-fifth supplements to the Prospectus all published on the Issuer's website at https://lordslb.lt/orkela_bonds/ has not been approved by the Bank of Lithuania and is provided only for informational purpose.

could cause the Company significant time and expense in remediation of any deficiencies and could impact its reputation, which could adversely affect its reputation and profitability.

Economic environment (both domestic and international) and insolvency risk

The Issuer's activities and results depend on the economic processes in Lithuania and internationally. Since the beginning of the COVID-19 pandemic the businesses across the globe are facing economic disruptions, supply-demand imbalances, and high uncertainty about the prospects of the business development. The war between Russia and Ukraine is also contributing to already existing economic tension, however currently it is hard to estimate what impact the war will have on Lithuanian economy.

Even if currently there is no material economic downturn both domestically and internationally, in the event of its occurrence, the demand for the Issuer's services may decrease, the risk of insolvency of the Company's tenants and/or other contractors may increase, which may have a negative impact on the implementation and results of the Issuer's business strategy and the Project may not generate expected positive returns. These factors individually, or in combination might cause the insolvency of the Issuer. The Issuer is subject to the Law on Insolvency on Legal Entities of the Republic of Lithuania and Issuer's insolvency may affect the Investors' ability to recover their investments.

Negative equity risk

According to the BAS Financial Statements for the year ended 31 December 2021, the Issuer had a negative equity amounting to -EUR 6,761,260 during the financial year 2021, i.e. the Issuer's liabilities exceeded the amount of the Issuer's equity. The negative equity situation has been rectified partially on 24 February 2022 by issuing and subscribing by the Fund 20 new Shares of the Issuer with EUR 25 par value each. The subscription price of new Shares was EUR 7,000,000, which has been paid by the Fund by setting of the obligations for partial redemption of bonds issued under the Bond subscription agreement of 15 November 2018 (disclosed under Section 5.14 *Material Contracts*) and payment of subscription price for new Shares. On 2 May 2022 the shareholder (i.e. the Fund) decided to cover the negative equity by additional shareholder's injection of EUR 203,727, which has been paid by the Fund by setting of the obligations for partial redemption of bonds issued under the Bond subscription agreement of 15 November 2018 against the obligation to pay in the injection. As of 2 May 2022, the Issuer's equity is positive and reaches EUR 100,000. Although solved, such change is not reflected in the available financial statements of the Issuer and has not been audited yet. Moreover, there is a risk that negative equity situation may repeat or reemerge until the day the Projects starts generating income. The described situation may negatively impact the Issuer's ability to get financing/refinancing for the Project's development and/or to redeem the Bonds in a timely manner.

Liquidity risk

Liquidity risk is the risk that the Issuer is unable to maintain a sufficient reserve of cash and other liquid financial assets that can be used to meet its payment obligations as they fall due and to redeem the Bonds. The availability of liquidity for business activities and the ability to access long-term financing are necessary to enable the Issuer to meet its payment obligations in cash, whether scheduled or unscheduled. The Fund is ensuring the needed capital availability to the Issuer. Although the Issuer and the Fund monitors its liquidity position and follows procedures to manage liquidity risk, a reduction in the Issuer's or the Fund's liquidity position could have a material adverse effect on the Issuer's and the Fund's business, financial condition, results of operations or prospects, as well as ability to redeem the Bonds at their maturity.

4.1.2. Business activities and industry risks

Hospitality market risk

A large part of the Project is dedicated to the development of the hotel complex. The Lithuanian and global hotel sector has been highly affected by the COVID-19 pandemic, which according to the statistical data has led to a sharp drop in number of incoming tourists (approx. 1.7 million in 2019 and 0.5 million in 2020, according to the information from the Official Statistics Portal). and of almost 50% in occupancy rates. If the negative impact of COVID-19 persists until the opening of the planned hotel as a part of the Project, it may lead to worse-than-expected financial results of the hotel assets, which in turn may adversely affect the Issuer's ability to redeem the Bonds. In addition to that Russia's war in Ukraine, still ongoing on the date of this Prospectus, could have a negative effect on the Lithuania's attractiveness as a destination for foreign

NOTE: this consolidated Prospectus containing amendments made under the first-fifth supplements to the Prospectus all published on the Issuer's website at https://lordslb.lt/orkela_bonds/ has not been approved by the Bank of Lithuania and is provided only for informational purpose.

tourists. A resulting drop in demand could have a negative effect on the financial results of the hotel assets of the Project which in turn would adversely affect Issuer's ability to redeem the Bonds.

Real estate market risk

Potential negative development of Lithuanian real estate market could have a negative impact on both real estate market prices and market transaction volume. At the date of this Prospectus increase in geopolitical risks caused by the Russia's war in Ukraine is considered as a one factor which could have a negative effect on the Lithuanian real estate market. Decreases in prices and volumes could have an adverse effect on the Company's financial position and could degrade the value and liquidity of real estate mortgaged in favour of the Bondholders as a Collateral which in turn could have adverse effect on the Bondholders' ability to fully satisfy their claims against the Issuer under the Bonds.

Counterparty risk

Counterparty risk is inherent to all business activities the Company is engaged in. In case of the Issuer the most significant counterparty risk stems from the Issuer's business partners engaged in the development and construction of the Project. Realisation of the counterparty risk may result in financial losses. Default of the Company's counterparty may affect the completion of the Company's commenced investment projects, the quality of services provided by the Company or harm the Company's, Fund's and Management Company's reputation. Although the Company and the Management Company monitor the counterparty risk, the occurrence of any of the mentioned counterparty risks may have an adverse impact on the Company's business and financial position.

Competition risk

The key business of the Issuer is the development of the Project. It is possible that by the time of completion of the Project alternative properties with comparable functionality could be developed or reconstructed from existing properties, therefore the competitors could target tenants of the Company offering discounts and/or other favorable terms.

In such a case occurrence of competing properties would increase competition that might affect the Issuer's profitability as the Company would have to make concessions to retain tenants. Moreover, the Issuer's improper reaction to the actions of competitors or changes in the environment could decrease demand for the Project's property which in turn could affect the Project's profitability and result in worse financial performance of the Issuer.

4.1.3. Legal risks

Risk of legal disputes

Even though the Issuer is not involved in any legal proceedings at the moment, it is possible that the Issuer may be involved in legal disputes due to its activities (as plaintiff or defendant) in the future, the outcome of which cannot be predicted in advance. The issuer is developing the Project within historical central area of the Vilnius, which leads to high public interest and regulatory scrutiny. As the Project is in the historical site, there are multiple local communities and stakeholders, which have various expectations for the Project being developed, what leads to the moderate legal dispute risk level. The Issuer has already obtained building permits and approvals from authorities and is following all the technical and legal requirements and takes into consideration expectation of local communities. However, in unlikely situation where dispute is resolved in the manner unfavourable to the Issuer, this could adversely affect its operations, financial condition, and reputation as the Issuer may be required to pay damages awarded, including the legal costs of the opponent (the Issuer itself would also incur legal costs). All of this can have an impact on the Issuer's ability to properly perform its obligations to the Bondholders, and on the attractiveness and liquidity of the Bonds.

4.1.4. Governance and internal control risks

Ownership risk

The Issuer is a company 100% owned by the Fund that is controlled by the Management Company, having prominent expertise, management team, professional staff and resources to outsource professional

NOTE: this consolidated Prospectus containing amendments made under the first-fifth supplements to the Prospectus all published on the Issuer's website at https://lordslb.lt/orkela_bonds/ has not been approved by the Bank of Lithuania and is provided only for informational purpose.

advisers. The Fund shall be closed after 5 years from its establishment in 2016, with the possibility to prolong its term for additional 2 years. Change in ownership of the Issuer (in case of the closure of the Fund at its maturity or sale of the Issuer's Shares before Fund's maturity) could result in reduction of attractiveness and liquidity of the Bonds, as well as early redemption of Bonds. To mitigate this risk the Change of Control covenant is assumed by the Issuer (please see Section 7.3.1.3 *Change of Control*), breach of which shall be considered as one of the Extraordinary Early Redemption Events.

Management and human resources risk

The Issuer's results largely depend on the Issuer's and Management Company's employees' teams and their decisions, and on the competence and experience of the team members.

The Management Company's success and its ability to manage growth initiatives depend on qualified executives and employees, certain executive officers of the Issuer and Management Company, and employees with special expertise in the development, financing, engineering, construction, operation and maintenance of projects. Given their expertise in the industry, their knowledge of the Management Company's business processes and their relationships with the Management Company's local partners, the loss of the services of one or more of these individuals could have a material adverse effect on the Management company's business, financial condition, results of operations or prospects.

Additionally, from time to time, executives, and other employees with technical or industry expertise may leave the Management Company. The Management Company's failure to promptly appoint qualified and effective successors for such individuals or inability to effectively manage temporary gaps in expertise or other disruption created by such departures, could have a material adverse effect on the Issuer and Management Company's business, financial condition, results of operations or prospects.

4.2. Risk factors related to the Bonds

4.2.1. General Bonds' risks

Inflation risk

Inflation reduces the purchasing power of a Bond's future coupons and principal. Inflation may lead to higher interest rates which could negatively affect the Bond price in the secondary market. In addition to that, at the time of this Prospectus high inflation is viewed globally as one of the main macroeconomic factors posing significant risk to global economic growth and consequentially to the value of both equity and debt securities.

Interest rate risk

The Bonds bear interest on their outstanding Nominal Value at a fixed interest rate. Investor is exposed to the risk that the value of the Bonds decreases as the results of changes in the market interest rates. While nominal interest rate of the Bond is fixed until its redemption, the prevailing capital market rates change on a daily basis. If the market interest rate increases, the market value of the Bond may fall.

Refinancing risk

The Issuer after completion of the constructions may be required to refinance certain or all of its outstanding debt, including the Bonds. The Issuer's ability to successfully refinance its debt is dependent on the conditions of the debt capital markets and its financial condition at such time. In unfavourable debt capital market situation, the Issuer's access to financing sources at a particular time may not be available on favourable terms, or at all. The Issuer's inability to refinance its debt obligations on favourable terms, or at all, could have a negative impact on the Issuer's operations, financial condition, earnings and on the Bondholders' recovery under the Bonds. The Issuer is actively monitoring debt capital market conditions and analysing feasibility of the alternative refinancing options, including selling the Project after construction will be finished. The Issuer plans as well to use bank loan as the main source for the redemption of the Bonds. The Issuer's preventative actions and/or anticipated plans on refinancing of the Bonds described above does not guarantee that the Issuer will be able to redeem the Bonds as anticipated on the day of the Prospectus and that Bondholders will recover their planned investments.

Credit and default risk

NOTE: this consolidated Prospectus containing amendments made under the first-fifth supplements to the Prospectus all published on the Issuer's website at https://lordslb.lt/orkela_bonds/ has not been approved by the Bank of Lithuania and is provided only for informational purpose.

Bondholders are subject to the risk of a partial or total failure of the Issuer to make interest and/or redemption payments that the Issuer is obliged to make under the Bonds. The worse the creditworthiness of the Issuer, the higher the risk of loss. A materialization of the credit risk may result in partial or total failure of the Issuer to make interest and/or redemption payments.

The Issuer is not guaranteeing that no default under this Prospectus will occur until the Final Maturity Date of the Bonds, therefore the Investors shall independently assess the Issuer's creditworthiness before investing into the Bonds.

Early redemption risk

According to the terms of the Offering established in this Prospectus, the Bonds may be redeemed prematurely on the initiative of the Issuer. If the early redemption right is exercised by the Issuer, the rate of return from an investment into the Bonds may be lower than initially anticipated by the Investor.

Moreover, there is no guarantee by the Issuer that Extraordinary Early Redemption Event (including the Change of Control in general whether due to the end of the Fund or sale of Issuer's Shares) will not occur, therefore in case of the occurrence of the Extraordinary Early Redemption Event the Bonds will have to be redeemed by the Issuer in accordance with the procedure established in this Prospectus and the rate of return from an investment into the Bonds may be lower than initially anticipated by the Investor.

Transaction costs/charges

When the Bonds are purchased/subscribed or sold, several types of incidental costs are incurred in addition to the purchase/issue or sale price of the Bonds. To the extent that additional – domestic or foreign – parties are involved in the execution of an order, including but not limited to domestic dealers or brokers in foreign markets, Bondholders may also be charged for the brokerage fees, commissions and other fees and expenses of such parties and/or there might be other charges that could not be foreseen by the Issuer and disclosed in this Prospectus.

Moreover, changes to the laws and legal acts applicable in the Republic of Lithuania and/or the Bondholder's domicile, or the implementation of any new laws or other legal acts may cause additional expenses or taxes for the Bondholder and/or reduce the return on investment for the Bondholder.

4.2.2. Offering and Admission to trading on the Bond List of Nasdaq related risks

Project Rating risk

If the Bonds are offered through the Platform by way of the Crowdfunding, the Investors shall acknowledge that the Project Rating is not an official rating of a credit rating agency, also it is not approved by any competent authority and is determined independently by the Platform Operator following its own assessment methodology. Therefore, each potential Investor into the Bonds should assess the Project Rating, if any, and its assessment methodology with caution before making any investment decision. The Project Rating will be disclosed on the Platform that will be indicated on the Issuer's website before opening of the Subscription Order of the respective Tranche under which the Platform is to be used in connection with the Offering.

Platform Operator risk

The Issuer cannot guarantee due performance of the Tripartite Agreement, if any, by the Platform Operator, and/or that the Platform through which the Crowdfunding would be carried out will work without interruptions and/or free of errors. Therefore, there is a risk that the Investors' Subscription Orders placed through the Platform within the respective Subscription Period might have significant deficiencies and/or will not be accounted by the Platform Operator and/or provided by the Platform Operator to the Lead Manager in accordance with this Prospectus and Tripartite Agreement and therefore, such Subscription Orders will have to be considered as invalid. Moreover, there is a risk that the Platform Operator acting on behalf of the relevant Investors will not transfer the collected payments for the Bonds subscribed through the Platform to the Settlement Account on the relevant Payment Date and the Issuer will have no obligation to issue Bonds for the Investors under such circumstances and/or to ensure that the Platform Operator has refunded the Investors. Each potential Investor into the Bonds should assess the above risks and reliability of the

NOTE: this consolidated Prospectus containing amendments made under the first-fifth supplements to the Prospectus all published on the Issuer's website at https://lordslb.lt/orkela_bonds/ has not been approved by the Bank of Lithuania and is provided only for informational purpose.

Platform Operator and the Platform, if any, disclosed by the Issuer in the conditions of the respective Tranche published on the Issuer's website in accordance with the Prospectus, before making decision to subscribe to the Bonds through the Platform.

Liquidity risk

The Bonds constitute a new issue of securities by the Issuer. Prior to Admission to trading on Bond List of Nasdaq, there is no public market for the Bonds and other securities of the Issuer. The liquidity of the Bonds cannot be guaranteed. In addition to that, the Bond List of Nasdaq, compared to other international debt securities markets, is characterised by relatively low liquidity and limited secondary trading. As a result, the Bondholders might bear a loss due to not being able to sell the Bond or having to sell them at an unfavourable price.

Continuous Offering

Offering under this Prospectus is a second part of total EUR 40,000,000 Issue. Although the Issuer plans to proceed with the public Issue up to total EUR 40,000,000 amount, it may happen, that the Issuer will not issue anticipated units of Bonds under this Prospectus and will not raise estimated proceeds required for successful development of the Project. Notwithstanding previous concern regarding success of the Offering under this Prospectus, there is a risk that the third part of the Issue in the amount of up to EUR 17,000,000 (or increased amount due to unsuccessful Offering under this Prospectus) to be offered under new prospectus won't be approved by the Bank of Lithuania (or won't be approved under the same rules) and therefore new prospectus won't be published (or will be published with material changes). Both situations would have significant influence on the amount of total proceeds from the Bonds, development of the Project, financial stability of the Issuer and the amount of Bonds available in the market.

Not suitability of the Bonds to some Investors

Bonds may be attractive for Investors who desire a source of regular income or are looking to diversify their portfolio of investment assets. Nevertheless, the Bonds may be not suitable investment to some Investors. Each potential Investor into the Bonds should assess suitability of the investment taking into account all relevant personal circumstances, reserve of sufficient financial resources and liquidity to bear all the risks of investing in the Bonds or holding the Bonds to maturity, including losing all or a substantial amount of the capital invested. The assessment of suitability is one of the key requirements for Investor protection. The potential Investor shall be aware, that the Issuer itself is not obliged and will not carry out the assessment, whether the Bonds are a suitable financial product for him/her (although such assessments will be performed by the Lead Manager/Managers and Platform(s), in any case such assessment(s) may have a different scope and produce a different result). Prospective Investor should not invest into the Bonds unless he/she has sufficient personal experience himself/herself or with the advice of professional financial advisors, can evaluate the impact on the value of the Bonds upon changes in market and economic conditions, the resulting effects on the value of such Bonds and the impact this investment will have on the potential Investor's overall investment portfolio.

4.2.3. Collateral related risks

Risk of insufficient value of the Collateral

The Issue is secured by a first ranking mortgage over the Collateral under the Collateral Agreement. Apart from the Collateral, there are no other securities of third parties securing the Issue under this Prospectus. Collateral consists of real estate property currently developed and constructed by the Issuer as a part of the Project. As a result, the value of the Collateral directly depends on the construction progress and successful completion of the Project and in case of Issuer's default before the end of construction stage the value of the Collateral could be not high enough to cover Issuer's obligations to the Bondholders. In addition to that, in case of negative development of Lithuanian real estate market and resulting significant drop in the value of the Collateral even after completion of the Project, the value of Collateral could be not high enough that all claims of the Bondholders could be satisfied.

Global Travel Market

The World Tourism Organization data shows that the number of international tourist arrivals decreased by 74% (i.e., 1 billion) in 2020 compared to 2019.

Tourism sector historically has proven its resilience to demand shocks and capacity to create jobs after crisis situations (graph below).

Hotel industry experts STR, Inc. recovery predictions show hotel occupancies by the end of 2021 should have been 30-40 percentage points lower than in 2019, while occupancy by the end of 2022 will be 10-15 percentage points lower than in 2019.

Markets with more domestic demand may expect recovery by the end of 2023, markets with more international demand – later than 2023.

Budget and selected service hotels will recover faster as well as regional markets.

Other travelers' bookings may suffer as a result of a loss of trust following the Russian invasion, however the entire impact will not be known until after the end of Spring. According to travel companies, European reservations from the United States have stalled after rising in early 2022 despite covid-related travel restrictions. According to OAG, an airline data source, some scheduled flights to nations such as Finland and Sweden, as well as most of eastern Europe, have been canceled due to the war's closeness.

Meanwhile, Russia will lose foreign tourist visits, which used to total 25 million each year, the majority of which came from Ukraine. In turn, Ukraine would lose around 14 million tourists each year, the most of them will be Russian. The majority of the well-traveled roads connecting the two nations are currently blocked by tanks and rockets and are unlikely to reopen anytime soon. The majority of other travelers will do the same.

Hospitality market in Lithuania

The hotel market is not sufficiently filled, especially with hotels of international chains. The good performance of hotels in recent pre-Covid years and the relatively high occupancy rate nationwide also create favorable conditions for development.

Even though hospitality businesses have been severely affected by Covid-19, the industry is expected rebound quickly in 2022-2023 and surpass the numbers of 2019.

In 2021, 3.5% more tourists stayed in hotels in Lithuania than in the 2020. The small increase could be explained by the lengthy lock-down period which was in place for the first 6 months of 2021.

The largest number of tourists in hotels came from Poland – 25,500, which accounted for 13.4% of the total number of tourists from abroad. The number of tourists from EU countries grew by 19.1% compared to the Q3 of 2020 and amounted to 171,500. The number of foreign tourists increased by 32.2% in 2021.

Global Private Education segment

In today's world, with a steady increase in understanding of the need for primary training among parents, educational institutions and investors, there is a great need for high-quality schooling to boost private schools' tuition fees.

However, the education services on the market are insufficient. One of the main obstacles for the education sector is the small availability and lack of funding available for the students.

Several steps were taken in the last few years to increase quality in education, such as the establishment of quality insurance bodies and promoting technology-driven education, among others, which combined to demonstrate changes in education quality.

With the evolving technology environment, companies are continually searching for people who will be at the forefront of this transition and quickly respond to those changes.

The shortage of qualified employees has been one of the biggest obstacles for companies, leading individuals to advanced high school classes that can be beneficial to students on a long-term basis.

Lithuanian Private Education sector

The sector of private (non-state) education is not large in Lithuania but it has been gradually expanding in recent years.

In 2015, there were 40 private schools in Lithuania, at the end of 2021 there were 57, which means 17 new non-state educational institutions were established in the last six years. In addition, a number of schools have grown from primary schools to junior high schools or primary high schools, and from junior high schools to gymnasiums.

Taking into account the latest publicly available statistics data, from 2017 to 2021 the enrollment in private general education schools have increased by more than 7% each year. While enrollment in private higher education during the same period have risen by almost 4% each year.

The Trustee shall be entitled (but is not under any circumstances obliged) to request instructions, or clarification of any direction, from the Investors as to whether, and in what manner, the Trustee should exercise or refrain from exercising any rights, powers and discretions with regard to the enforcement of the Collateral. Any such instruction from the Bondholders' Meeting will be binding on all Investors. The Trustee shall not be liable in front of Investors for acting (or refraining from acting) as described in this Section.

The proceeds from the enforcement of the Collateral shall be applied in the following order of priority:

- (i) as a first priority – to the satisfaction and payment of all costs and expenses (including, without limitation, state duties, notary fees and valuation costs and fees) related to or arising from enforcement of the Collateral by the Trustee within the limits set forth in the Agreement on Bondholders' Protection;
- (ii) as a second priority (after the full satisfaction, payment and deduction of all claims and amounts set forth in point (i) above) – payment of the claims of the Investors (other than the Related Entities) arising under this Prospectus;

In case the proceeds remaining after satisfying the claims of the Investors which are other than the Related Entities under point (ii) above do not cover the claims under point (iii) above in full, the claims arising from the Bonds subscribed by the Related Entities shall be satisfied *pro rata*.

The Trustee is not obliged to pay to the Investors or any other person any interest on the proceeds from the enforcement of the Collateral (whether deposited or not).

In case the Trustee is required, under applicable laws, to withhold or pay any taxes in connection with payments to be made by the Trustee hereunder, the amount to be paid by the Trustee shall be reduced by the amount of respective taxes and only the net amount shall be paid by the Trustee.

Taxation of Bond Interest

(i) Received by Entities

According to Lithuanian Law on CIT, payments of Bond interest (including other applicable payments received as the difference between Bonds' redemption and issue price) received by:

- a resident entity will be included in its taxable profit and will be subject to the 15 % CIT rate or incentive CIT rate (banks and credit unions, including branches of foreign banks in Lithuania shall pay additional 5 % CIT on profits, subject to special calculation rules, exceeding EUR 2 million).
- a non-resident entity, which is registered or otherwise organized in a state of the EEA or in a state with which Lithuania has concluded and brought into effect a DTT, will not be subject to the withholding tax in Lithuania.
- a non-resident entity other than those described above will be subject to the 10% withholding tax.

In case person paying Bond interest cannot identify the Bond holder in order to determine its eligibility for a lower tax rate or exemption from the withholding tax, payments of Bond interest to any such holder of Bonds will be subject to the standard 15% CIT rate to be withheld in Lithuania. Since the same provisions concerning relevant forms to be filled in to claim DTT benefits apply as in case of Lithuanian tax non-resident individuals, please see Section 7.5.1.1. *Taxation of Bond Interest Received by Lithuanian Tax Non-Resident Individuals*.

(ii) Received by Individuals

Payments of Bond interest (including other applicable payments received as the difference between Bonds' redemption and Issue Price) received by a resident or non-resident individual will be subject to Lithuanian PIT at the following progressive tax rates of:

- 15%, if the total amount of income received by an individual during a calendar year does not exceed the sum of 120 Lithuanian gross average salaries, which is determined on the basis of quarterly gross average salaries as published by the Lithuanian Department of Statistics (this figure in 2022 is EUR 180,492), and
- 20%, which apply to any income by an individual received during a calendar year exceeding the above-mentioned threshold.

For resident individuals, such income will exclude income from employment, self-employment, dividends, remuneration of board members and certain other types of income. PIT is paid by a resident individual himself/herself, however the total amount of interest received by resident individuals during a calendar year not exceeding EUR 500 will be tax exempt.

For non-resident individuals, such income will include Lithuanian-sourced interest, royalties, income from sports and entertainment activities, capital gains and rent from real estate located in Lithuania and capital gains from movable property registerable in Lithuania.

When interest is earned by a non-resident individual, the interest-paying Lithuanian entity or a PE of a foreign entity withhold 15% PIT and if it turns out at the end of the year that a part of the amount was actually subject to the 20% rate, the individual has to pay the difference himself/herself. Separate DTT concluded and brought into effect with Lithuania may establish a lower tax rate for non-residents. Please see more information on taxation of Bond interest received by Lithuanian tax non-resident individuals in the Section 7.5.1.1. below.

Taxation on Income from the Alienation of Bonds

(i) Received by Entities

Capital gains (i. e. the difference between Bonds' sale price and acquisition costs) on alienation of the Bonds received by a resident entity will be included in entity's taxable profit and will be subject to the 15% CIT rate or in certain cases incentive CIT rate. Banks and credit unions, including branches of foreign banks in Lithuania shall pay additional 5 % CIT on profits, subject to special calculation rules, exceeding EUR 2 million.

Any capital gains on alienation of the Bonds received by non-resident entities will not be subject to Lithuanian CIT.

NOTE: this consolidated Prospectus containing amendments made under the first-fifth supplements to the Prospectus all published on the Issuer's website at https://lordslb.lt/orkela_bonds/ has not been approved by the Bank of Lithuania and is provided only for informational purpose.

(ii) Received by Individuals

Capital gains (i. e. the difference between Bonds' sale price and acquisition costs) on disposal of the Bonds received by a resident individual will be subject to progressive PIT rates as in case of taxation of Bond interest.

Capital gains up to EUR 500 received by resident individuals from the alienation of Bonds during a calendar year will be tax exempt. However, such tax relief is not applicable if the capital gains are received from entities established or individuals permanently residing in a tax haven included in Lithuanian Target Territories List approved by the Minister of Finance of the Republic of Lithuania.

The disposal of the Bonds by non-resident individuals will not be subject to Lithuanian PIT.

7.5.1.1. Taxation of Bond Interest received by Lithuanian Tax Non-Resident Individuals

Under the Lithuanian Law on PIT, if interest is paid out to the tax non-resident individuals by the Lithuanian company, PIT should be withheld at source, i.e., in the Republic of Lithuania. The applicable PIT rate can be reduced if the Lithuanian tax non-resident is a tax resident in the country with which the Republic of Lithuania has a valid DTT. Taking into account that the DDT provisions prevail over national laws, tax rates that are indicated in the DTT should be applicable. For your convenience, the applicable PIT rates on interest for each country's tax residents may be found here.

Interest received by a tax resident of the country, with which no DTT is concluded, is subject to PIT at rates of 15% or 20%.

A reduced rate of PIT

The reduced PIT rate can apply to Bond interest income receivable from the Company if a completed **form DAS-1** (*Claim for reduction or exemption from the anticipatory tax withheld at source*) is submitted to the Company before the pay-out for each calendar year, i.e., the same form is valid only for one year. The tax residency status should be confirmed by the foreign Tax Authorities in the said form.

The Company has to keep DAS-1 form in its internal records, and it should be provided to the Tax Authorities upon a request. Lithuanian Tax Authorities prefer to receive DAS-1 form filled in the Lithuanian language.

The detailed steps of the DAS-1 completion are provided below:

- The *preamble* of the form should indicate the name of the country of tax residence of a Lithuanian tax non-resident.
- The *preamble* and *Sections I-III* should either be completed by the Company or by the non-resident individual. The type of income - "*Palūkanos už ne nuosavybės vertybinius popierius*" (interest on Bonds) – should be indicated in the box "*Pajamų rūšis/Type of income*" (*Section III*).
- *Section IV* should indicate only the name, surname of the tax non-resident individual, his/her signature, and date.
- *Section V* should be completed and confirmed by the tax residence country's Tax Authorities (by the signature of the representative, stamp). If, according to the national laws, the Tax Authorities are not allowed to confirm such forms, the tax residency certificate (confirmed by the respective Tax Authorities) can be provided to the Company. The original copy of the tax residency certificate should be attached to DAS-1 form. If so, the information that the tax residency certificate is attached should be indicated in the field "*Priededama*", i.e. "*Priededama rezidavimo vietą patvirtinanti pažyma*". The original name of the document, the date of issue, its number (if any), and the number of pages should be indicated as well.
- When the above-mentioned Sections of DAS-1 form are completed and required tax residence confirmations are obtained, it is necessary to submit the original DAS-1 form to the Company. It can be mailed at:

UAB "Orkela"
Jogailos st. 4,
LT-01116 Vilnius
the Republic of Lithuania

NOTE: this consolidated Prospectus containing amendments made under the first-fifth supplements to the Prospectus all published on the Issuer's website at https://lordslb.lt/orkela_bonds/ has not been approved by the Bank of Lithuania and is provided only for informational purpose.

When the Company receives DAS-1 form, it will have a right to apply the reduced PIT rate on interest received by the Lithuanian tax non-resident who is indicated in DAS-1 form. The Company completes *Section VI* by indicating the gross amounts of interest paid and PIT withheld during the calendar year. This document should be kept by the Company for its records.

A special claim for a PIT refund in the Republic of Lithuania

If the standard PIT rate has already been withheld at source by the Company, the tax non-resident of the Republic of Lithuania has a right to claim for a tax refund. In order to receive a tax refund, **DAS-2 form** (*Claim for a refund of the tax withheld at source*) should be submitted to the Lithuanian Tax Authorities.

It is necessary to complete two copies of DAS-2 form, i.e., one should be provided to the Lithuanian Tax Authorities and another should remain for the records of the individual. Lithuanian Tax Authorities prefer to receive DAS-2 form filled in the Lithuanian language.

Despite the fact that no official timing is set in the legislation for the submission of this form, it is recommended to submit it to the Tax Authorities not earlier than 15 February of the year following the calendar year of interest receipt. This is recommended since the Company is obliged to report the annual payments made to individuals to the Tax Authorities until this date. The claim for refund should be filed within 5 calendar years following the year of interest receipt.

The certificate in which the amounts of interest paid and tax withheld are identified by the Company might not be sufficient if a claim for the tax refund is submitted in the same calendar year during which the interest income was received.

The detailed steps of DAS-2 completion are provided below:

- The *preamble* of the form should indicate the name of the country of tax residence of a tax non-resident of the Republic of Lithuania.
- *Sections I and V* should be completed by the individual and sent to the Company. PIT overpayment will be refunded to the bank account indicated in *Section I*. The said bank account can be opened either in a bank that operates in the Republic of Lithuania or in a foreign country.
- *Sections II, III, and IV* should be completed by the Company and returned to the individual.
- *Section VI* should be completed and confirmed by the tax residence country's Tax Authorities (by the signature of the representative, stamp). If according to the national laws, the Tax Authorities are not allowed to confirm such forms, the tax residency certificate (that is confirmed by the respective Tax Authorities) can be provided. The original copy of the tax residency certificate should then be attached to DAS-2 form. If so, the information that the tax residency certificate is attached should be indicated in the field "Priededama", i.e. "*Priededama rezidavimo vietą patvirtinanti pažyma*". The original name of the document, the date of issue, its number (if any), and the number of pages should be indicated as well. The tax/calendar year, for which the tax residence status is confirmed, should be stated on the document, otherwise, it may be impossible to receive the tax refund that is claimed by the Lithuanian tax non-resident.
- The last section of the form "*Lietuvos Resublikos mokesčių administratoriaus sprendimas/Decision of the Tax Authority of the Republic of Lithuania*" should remain empty, since it should be completed by the Lithuanian Tax Authorities.
- It is necessary to submit (e.g., by mail) one copy of DAS-2 form to the Lithuanian Tax Authorities at the below-indicated address (or any other territorial department of the Lithuanian Tax Authorities). The copy of the individual's personal document (passport or ID card) which is signed by the individual should be enclosed to the completed DAS-2 form as well:

Vilniaus apskrities valstybinė mokesčių inspekcija
Ulonų st. 2
LT- 08245 Vilnius
the Republic of Lithuania

The Lithuanian Tax Authorities should make the decision regarding the PIT refund within 30 calendar days after the completed DAS-2 form is received. If the decision is in favor, money should be transferred to the bank account indicated in DAS-2 form within the same 30 days. The confirmed copy of DAS-2 will be mailed back to the individual's address.

(i) Received by Entities

According to the Latvian Law on CIT, payments of Bond interest received by:

- a resident entity and a non-resident entity operating in Latvia through a PE is not subject to the Latvian CIT, yet profit distributions are subject to Latvian CIT at a rate of 20% (effective CIT rate – 25%);
- a non-resident entity is not subject to Latvian CIT;

Latvian CIT is charged on direct profit distributions, such as dividends, as well as on implicit (hidden) distributions, including non-business expenses, interest payments made in excess of defined thresholds, loans made to related parties (subject to specific criteria), transfer pricing adjustments and other hidden distributions. Latvian CIT is imposed at the level of the company making the distributions at the time when such profit distributions are made. Profit distributions are taxed at the rate of 20% of the gross amount of the distribution (tax base is divided by 0.8 and then tax applied at the rate of 20% resulting in the effective rate of 25%). Republic of Latvia further does not levy any withholding tax on dividends, interest or royalties, except where payable to persons resident in a statutory low or no tax country.

(ii) Received by Individuals

Payments of Bond interest received by a resident individual will be subject to Latvian PIT at the rate of 20%, to be withheld by the Issuer. Income tax paid on interest in a foreign state may be deducted from income tax payable in the Republic of Latvia only if the taxpayer submits a certificate issued by the foreign tax administrator or withholding agent certifying the payment of income tax or another tax equivalent to income tax.

Bond interest income of a non-resident individual earned in the Republic of Latvia is not subject to Latvian PIT where the Bonds are publicly traded on a regulated market.

Taxation on Income from the Alienation of Bonds

(i) Received by Entities

Capital gains (i.e., the difference between Bonds' sale price and acquisition costs) earned in the Republic of Latvia and foreign states (i.e., sourced inside and outside of the Republic of Latvia) on alienation of the Bonds received by resident entities will not be included in resident entity's taxable profit, yet profit distributions will be subject to Latvian CIT at a rate of 20% (effective CIT rate – 25%).

(ii) Received by Individuals

Capital gains earned in the Republic of Latvia on alienation of the Bonds received by resident individuals or non-resident individuals will be taxed identically as in case of taxation of Bond interest.

7.5.3. Republic of Estonia

Taxation of Bond Interest

(i) Received by Entities

Payments of Bond interest received by an Estonian resident entity are not subject to immediate taxation with Estonian CIT. All earnings of Estonian resident entities are included in their profits and are taxed only upon distribution (e.g., in the form of dividends). If the Bond interest was sourced and taxed abroad, then the income tax paid or withheld abroad can be deducted by the Estonian resident entity upon distribution of dividends, provided this is proven by a certificate issued by the foreign tax administrator or withholding agent certifying the payment of income tax or another tax equivalent to income tax.

(ii) Received by Individuals

NOTE: this consolidated Prospectus containing amendments made under the first-fifth supplements to the Prospectus all published on the Issuer's website at https://lordslb.lt/orkela_bonds/ has not been approved by the Bank of Lithuania and is provided only for informational purpose.

Payments of Bond interest received by an Estonian resident individual are subject to PIT at a rate of 20%. Income tax on interest payments to Estonian resident individuals is to be withheld by the payor (Issuer). However, income tax liability arising from Estonian-sourced interest can be postponed by way of acquiring the investment via Investment Account (in Estonian: *investeerimiskonto*) or Pension Investment Account (in Estonian: *pensionini investeerimiskonto*) (for more details please see below under "*Tax Deferral – Investment Account*"). In such event, income tax will not be withheld, provided the Estonian resident Bond holder notifies the payor that the Bonds were acquired from funds held in the Investment Account or Pension Investment Account (such tax deferral applies only to Estonian-sourced interest income).

Income tax paid or withheld from the payment of interest in a foreign state (from foreign source) may be deducted from income tax payable in the Republic of Estonia only if the taxpayer submits a certificate issued by the foreign tax administrator or withholding agent certifying the payment of income tax or another tax equivalent to income tax.

Taxation on Income from the Alienation of Bonds

(i) Received by Entities

Generally, capital gains earned from the sale or exchange of the Bonds (i.e., difference between the acquisition cost and the sale or exchange price of the Bonds) by Estonian resident entities are not subject to immediate taxation with CIT in the Republic of Estonia. All earnings of Estonian resident entities are included in their profits and are subject to taxation only upon the distribution of profit.

Estonian-sourced capital gains from the sale or exchange of the Bonds by a non-resident entity will not be subject to Estonian CIT.

(ii) Received by Individuals

Income earned by Estonian resident individual from the sale or exchange of the Bonds is taxed as capital gains from the transfer of property at the rate of 20 %. Earnings realised by an Estonian resident individual are taxable on a cash-basis: income tax from capital gains is not withheld by the Issuer and the Estonian resident individual has an obligation to declare the income and pay the income tax (self-assessment tax). The income tax obligation can be postponed if the Bonds are acquired via the Investment Account or the Pension Investment Account.

Income tax paid from the capital gains in a foreign state may be deducted from income tax payable in the Republic of Estonia only if the taxpayer submits a certificate issued by the foreign tax administrator or withholding agent certifying the payment of income tax or another tax equivalent to income tax.

Estonian-sourced gains from the sale or exchange of the Bonds by a non-resident individual will not be subject to Estonian income tax.

Tax Deferral – Investment Account

Estonian resident individuals may defer the taxation of their investment income (including interest, provided it is sourced in the Republic of Estonia, and capital gains) by using an Investment Account for the purposes of making transactions with financial assets (including Bonds). Investment Account is a monetary account opened with a credit institution based in a member state of the EEA or the Organisation for Economic Co-operation and Development (OECD) for acquiring financial assets. The moment of taxation of the financial income accrued on an Investment Account is deferred until such income is withdrawn from the Investment Account (i.e., the funds withdrawn exceed the amount previously contributed to the Investment Account). Hence, financial income accrued on the Investment Account can be reinvested tax-free until it is withdrawn from the Investment Account.

will take place within 10 Business Days as from the end of the Subscription Period of the respective Tranche. The payments shall be returned without any reimbursement for costs incurred by the Investors in the course of subscribing for the Bonds, and shall be net of all transfer expenses and without interest.

Payments for the Bonds are interest free.

Allotment of the Bonds to the Investors

After expiry of the relevant Subscription Period, the Issuer shall decide according to the time priority principle (first come-first served) on which Investors, which have provided their Subscription Orders, shall be allotted with the Bonds and to what amount, and which Investors shall not be allotted with the Bonds. For the establishment of the time priority principle, each duly signed Subscription Order will be registered on the Bond subscription journal, which will be managed by a dedicated employee of the Lead Manager. For the avoidance of doubt, to ensure the time priority principle as described above the Subscription Orders submitted through the Platform, if any, will also be recorded by the Platform Operator and the relevant data on the time of receipt of the Subscription Orders will be provided to the Lead Manager in accordance with the relevant Tripartite Agreement, also when an Auction is organized, Nasdaq will record buying orders entered in Nasdaq trading system by the Exchange Members during the Subscription Period and will provide the records journal to the Lead Manager in accordance with the Auction Agreement. If an Investor decides to decrease or increase number of Bonds being subscribed, previously submitted Subscription Order will be terminated, the Investor will lose its previous entry in the Bond subscription journal and its priority to be allotted with Bonds will be determined by a newly submitted Subscription Order within the Subscription Period, if any. When the aggregate amount of the respective Tranche of the Issue is reached, no more Bonds of this Tranche shall be allotted to the Investors. Therefore, there can be the case that the number of the Bonds requested in the Subscription Order of any Investor in case of oversubscription will be reduced accordingly, so that the Maximum Aggregate Nominal Value of the respective Tranche is not exceeded, and Investor waives any right to complaint on any such decision of the Issuer. If an Investor makes a Subscription Order after the expiry of the relevant Subscription Period (but prior to the Issue Date), the Issuer may decide on additional allotment of Bonds to such Investor if the Maximum Aggregate Nominal Value of the Tranche is not yet exceeded.

Confirmations

At the latest by 16:30 on the last Business Day before the relevant Payment Date of the respective Tranche the Issuer (or Lead Manager and/or Manager, if any, on the Issuer's behalf) shall submit the Confirmation to each Investor stating whether the Subscription Order was accepted, partially accepted or rejected. If the latter is not possible, because the Issuer has treated as valid also Subscription Orders submitted after the relevant Subscription Period, the Issuer (or Lead Manager and/or Manager, if any, on the Issuer's behalf) shall submit the Confirmation to the relevant Investor latest by 16:30 on the last Business Day before the Issue Date of the relevant Tranche. The Confirmations addressed to the Investors that placed their Subscription Orders through the Platform, if any, shall also be provided to the relevant Platform Operator in accordance with the Tripartite Agreement that the Platform Operator could transfer the required amounts on behalf of the Investors from the Platform Account to the Settlement Account.

For the avoidance of doubt, in case of an Auction, if any, the Confirmations are not sent to the Investors and/or Exchange Members, as announcement about allotment of the Bonds is made to the Exchange Members through Nasdaq CSD in accordance with the Auction Rules. The Exchange Members shall notify the relevant Investors about allotment of the Bonds pursuant to the Exchange Members' internal documents and procedures and applicable law.

The procedure of sending Confirmations shall apply to all Tranches of Bonds.

The Issuer, at its own discretion, may cancel the Primary Distribution at any time prior to the Issue Date without disclosing any reason for doing so. Any updates to the dates of opening and closing of the Primary Distribution or decision that the Primary Distribution will be suspended and that new dates of the Primary Distribution will be provided by the Issuer later are subject to supplement to this Prospectus. In such events, Subscription Orders for the Bonds that have been made will be disregarded, and any payments made in respect of the submitted Subscription Orders will be returned without interest or any other compensation to the Investors.

In such case, the Investors will be allowed to withdraw the Subscription Orders made by submitting a relevant statement to that effect within 3 Business Days after the supplement to the Prospectus has been published on the Issuer's website. For the avoidance of doubt, if the Investor does not provide a withdrawal statement, the Issuer will continue Primary Distribution on changed terms in accordance with published supplement to the Prospectus and relying on previously submitted Subscription Order.

Any decision on cancellation, suspension and changes of dates of the Primary Distribution or other information will be published on the Issuer's website at https://lordslb.lt/orkela_bonds/ and/or sent to the Investors via e-mail indicated by each Investor in its Subscription Order.
